## Geospatial Data Published in November of 2013

OCTO works to keep geospatial data current and introduces new and valuable GIS layers to the District government and public.

New data published in <http://data.dc.gov>

The DC GIS program operates a data maintenance and enhancement program to keep data current and introduce new and valuable GIS layers to the District government and public. The most recent data additions and updates to the DC GIS data services are:

Layer Name	Feature Class Name	Update Timeline				Summary Update Notes
		Central Database	DC GIS Tools	Data Catalog		
				ESRI Shapefile	Google KML	
<b>Administrative Boundaries</b>						
Architect of the Capitol	AOCPLY	Done	Done	Done	11/1/2013	<a href="#">Read VPM Notes</a>

Zoning	Zoning	Done	Done	Done	11/1/2013	update

For District government, the data is available in the DC GIS Central geodatabase, accessible through Citrix on the DC GIS tool bar.

For the public, the data is accessible through the [DC GIS Data Clearinghouse/Catalog](#) search engine. Enter a keyword or layer name into the search field to return metadata and download options. Download options are available for both ESRI and Google formats. DC GIS data can also be filtered by layer theme for grouped results. The [advanced search](#) allows for specialized searching.

If you have any comments about the site or experience any difficulties, please [email us](#).
