

## District of Columbia Interagency Data Team

March 13, 2019

2:00 PM – 3:30 PM

Office of Chief Technology Officer  
200 I Street SE, Washington DC, 20003  
Conference Room 1001A & 1001B

### Agenda

- **Welcome, News & Updates**  
Michael Bentivegna, Data Visualization and Analysis PM, Office of the Chief Technology Officer
- **Chief Data Officer's Annual Report**  
Barney Krucoff, Chief Data Officer, Office of the Chief Technology Officer
- **Enterprise Dataset Inventory Analysis**  
Peter Casey, Senior Data Scientist, Office of the Chief Technology Officer
- **MicroStrategy World – New Features & Solutions**  
Bircan Tekin, BI Solutions Architect, Data Visualization and Analysis PM, Office of the Chief Technology Officer

### Meeting Notes

Best attempt to capture notable comments and questions from attendees (paraphrased). For complete presentation visit, <https://octo.dc.gov/node/1310836>

- **Question:** Does OCTO offer Power BI?  
No, OCTO does not support Power BI. A few years ago, OCTO conducted a study of BI tools and centralized its services around Microstrategy and Tableau. For the foreseeable future, OCTO will be offering these solutions and not Power BI.
- **Question:** What is the difference between mayoral and non-mayoral  
Non-Mayoral are independent to the mayor and have a board like DC Water. Mayoral agencies are led by the mayor.
- **Question:** Last year there was a dashboard for the EDI. Will there be one for this year?  
We focused on the interface for entering the data, and this took some time. The dashboard fell by the wayside, but we will have a dashboard for next year's EDI.

- *Question:* Can you send the Data Report?  
We will send the link as soon as the report goes out
  
- *Question:* Have there been any conversations to facilitate exchange of data  
We have FME, informatica, Oracle, the SOA team provides audits for transactions and work the APIs and cloud providers. OCTO sees data exchanges as our main line of business.
  - Q. Bringing in outside jurisdictions
  - Go outside the API gateway. Need to plan on how to exchange with other people.
  
- *Question:* Will you bring back the refreshments  
Yes! We will do that next meeting now that Barney is back as CDO
  
- *Question:* Have you thought about using a Fire API?  
Frankly, we don't have as much market share in your cluster because DCAS is outside of our management. We care. We would like to know what is going on in your house. We need to debate our standards with you and possibly this becomes part of our procurement. We want to bring value to you.
  
- *Question:* When will the level 0 data be available in the Data Lake  
Begin training in the Data Scientist meetings in the next month or two. People need to be trained on how to use the application first before using it.
